SUMMARY

Strategic Engineering Leader with a proven track record of architecting and executing long-term technical visions across Software and Site Reliability Engineering. Driving alignment with executive stakeholders, fostering innovation, and building top-performing organizations that deliver measurable business value.

INDUSTRY

Google, 2014 – currently

Geo, Software Engineering — Senior Engineering Manager (L7)

- Developing Google-wide infrastructure, both applying and serving generative artificial intelligence **Award**: Geo Tech Impact

YouTube Trust & Safety, Software Engineering — Senior Engineering Manager (L7)

- Reengineered large pipelines, improved performance by **1000x**. **Award**: Performance Excellence
- Architected and deployed LLM infrastructure and tooling. Enabled **40+** engineering projects and **300+** analysts to extract complex insights. **Awards**: Engineering + Feature + Feature Excellence

Cloud Artificial Intelligence, Site Reliability Engineering — Senior Engineering Manager (L5→L7)

- Directed the productionization of 3 flagship products, unlocking **$XXXXM** revenue.
- Architected the technical strategy for **7** production areas (capacity management, platforms, service level objectives and key customer monitoring, geo-expansion, pre-production stack, data integrity, and model inference) spanning **1K+** engineers and **50+** products, and led **70** engineers to execute. Delivered savings of **$XXXM** in computing resources and significantly improved product reliability. **Awards**: Cloud + Core + Google Tech Impact, Perfy, Tech Debt Busters x2

Datacenter Software, Site Reliability Engineering — Technical Leader/Engineering Manager (L5)

- Orchestrated the modernization of critical datacenter systems. Accelerated the launch by a full year.

Apps Storage, Site Reliability Engineering — Senior Software Engineer, Technical Leader (L4→L5)

- Deployed capacity models for products with **1B+** users. Saved **$XXXM** in computing resources.
- Led the company-wide migration to a new storage service. **Award**: Feats of Engineering

ADVOCACY

People Leadership

- Co-authored a chapter on team overload for *The Site Reliability Workbook* published by **O'Reilly**.
- Designed and scaled the *Leadership Wheel of Misfortune* program to hundreds of sessions globally.
- Mentored and coached hundreds of engineers, technical leaders, managers, interns, and apprentices.
- Keynote speaker on career and technical topics at various universities.

Technical Influence

- Published an article on capacity management best practices in **USENIX** *;login:* magazine.
- Published talks on Google production environment, resources, and Paxos. Achieved **220K views**.

EDUCATION

University of Granada

Research fellow on computer vision and compilers, led a thesis on music languages. **Award**: Best Thesis.

Master in Research, Soft Computing and Intelligent Systems. GPA 9.3/10.

Bachelor of Science, Information Systems Engineering. GPA 8.7/10. **Award**: 1st in Class.

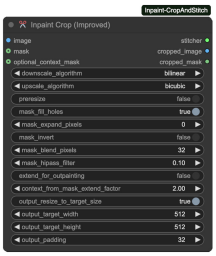

Master of Science, Computer Science. GPA 9.2/10. **Awards**: 1st in Class, National Award, Best Thesis.

Bachelor of Science, Computer Systems Engineering. GPA 8.7/10. **Award**: 1st in Class.

LANGUAGES

Spanish (Native), English (C2), German (B2), Swiss German (B1), and Esperanto (B1)

Personal Projects using Generative Artificial Intelligence

ComfyUI-InpaintCropAndStitch – ComfyUI Nodes for Inpainting

Developed ComfyUI nodes for generative image inpainting that increase prompt adherence, output quality, and performance by cropping the image around the masked area, resizing it to the model's preferred resolution, and then seamlessly restitching and blending it back in place.

Achieved **930K downloads** and **1.2K GitHub stars**.

Links: Comfy Registry, GitHub

Amateur Radio Contributions

qFT8 – Android Application for Portable Amateur Radio

Developed an Android application for amateur radio FT8, FT4, FT2, JS8, WSPR, and LQ8 digital mode communication with a portable transceiver. Offers a feature-rich yet intuitive interface, a web server for remote control, and complete integration with logbook services. Featured in the *FUNKAMATEUR* magazine, 08/2026, 626-627.

Achieved **6K monthly users** and a rating of **4.92/5**.

Links: Homepage, Google Play Store, GitHub, Direct Download

LQ Digital Mode Family – Next-Generation Weak-Signal Protocols

Developed the open-source LQ digital mode family by means of an optimized frame encoding. Achieves **1.5x the throughput** of FT8 and **4x** in pile-up conditions with zero propagation penalty.

Links: Homepage, arXiv, GitHub

Morse Training – Android Application for Morse Practice

Developed an Android Morse code practice keyer. Features support for both on-screen and external hardware paddles, several keyer algorithms, a highly configurable user interface, ultra-low latency with minimal jitter, transmission and reception training games, and a learning method.

Achieved **400 monthly users** and a rating of **4.67/5**.

Links: Homepage, Google Play Store, GitHub, Direct Download

Windlereye – Music Project

Wrote lyrics and leveraged generative artificial intelligence to produce over 200 original songs. Invited to present at the *AI: Heaven or Hype?* panel in the *After the Algorithm Zürich 2026* art festival, as a keynote speaker at the *GenAI Zürich 2026* conference, at the *Swiss AI weeks Hack Zurich* hackathon, and at the *Grüezi Google Techtalks: AI Innovation* event at the *Zürich AI Festival*.

Achieved **100K streams** and **4K monthly listeners**.

Links: Homepage, Spotify, YouTube Music, YouTube, Apple Music, Shop, Direct Download

Mi Libro De – Book Series

Authored, and used generative artificial intelligence workflows to illustrate, three Spanish-language children's books. Spanning themes of fantastic creatures, school humor, fantasy, and science fiction, the books are strategically designed to enhance reading comprehension and engagement.

Achieved **20K downloads** and a rating of **4.2/5** over **1000+ reviews**.
